Essential in PDMS (40 Hours)

S.No	Session	Topics	Type	Duration (Hours)
1	Session 1	Introduction of piping Stages in piping Introduction of PDMS Launching the PDMS **Getting started - PDMS** Graphical user interface Navigation tools Document and modules File management **Equipment modeling** Introduction Theory and procedure of component & equipment Starting the equipment application **Creating equipment** Create site Create zone Listing elements Creating equipment using primitives	Theory/Demo	2.0 Hrs
2	Session 2	Exercises included for practice	Practicals	2.0 Hrs
3	Session 3	**Creating equipment** Creating the negative primitives Creating the nozzles Creating equipment points **Modifying equipment** Modifying the NAME Modifying the ATTRIBUTES Modifying the PRIMITIVES Modifying the ATTRIBUTES GLOBAL Modifying the ANGLE Modifying the LIKE command Modifying the LOCK command Modifying the REPRESENTATION Modifying the SKETCH and TRIM command Modifying the SLIDE command Modifying the TO P-POINT command Modifying the NOZZLE SPECIFICATIONS Modifying the NOZZLE ATTRIBUTE Modifying the PROPERTIES Modifying the RE-EVALUTE RULES Modifying UNLINK FROM ORIGINAL Modifying the GROUP command Modifying the HIERARCHY Modifying the EQUIPMENT ORIGIN Modifying the SUB-EQUIPMENT SPECIFICATIONS Modifying electrical component selection	Theory/Demo	2.0 Hrs
4	Session 4	Exercises included for practice	Practicals	2.0 Hrs
5	Session 5	**Positioning equipment** Use of ANY command Use of ELEMENT command Use of P-POINT command Use of Pline command Use of AID command Use of SCREEN command **Editing equipment** Using MODEL EDITOR Using UNDO command Using REDO command Using RESELECT command Using MOVE SELECTION and ROTATE SELECTION Using MOVE and ROTATE HANDLE Using ALIGN WITH FEATURE command Using SNAP TO POINT Using FEATURE HIGHLIGHTING	Theory/Demo	2.0 Hrs

		Using SET INCREMENTS		
		Using SET HANDLE COLOR option		
		Using DRAG IMAGE tool		
		Using SELECT RECTANGLE tool		
		Using WHOOLY WITHIN option		
		Deleting the EQUIPMENT		
		Modifying PRIMITIVES		
		Equipment modeling by parametric method		
		Equipment reporting		
		Copying equipment		
		Measuring the size		
		Navigating to element		
		About design explorer		
6	Session 6	Exercises included for practice	Practicals	2.0 Hrs
7	Session 7	**Creating pipe**	Theory/Demo	2.0 Hrs
		Creating ZONE feature		
		Creating PIPE feature		
		Creating BRANCH		
		Creating COMPONENTS		
		Modifying the pipe		
		Modifying the PIPE feature		
		Modifying the BRANCH feature		
		Modifying using EXPLICIT command		
		Modifying the SPECIFICATIONS		
		Modifying using RESELECT command		
		Modifying the COMPONENT BORE specification		
		Modifying the COMPONENTS feature		
		Modifying the LEAVE TUBE		
		Modifying the CONNECTION REF		
		Modifying the DETAIL PLOT FILE		
		Modifying the HIERARCHY		
		Modifying the SLOPE COMMAND		
8	Session 8	Exercises included for practice	Practicals	2.0 Hrs
9	Session 9	**Positioning the pipe**	Theory/Demo	2.0 Hrs
		Positioning by EXPLICITLY and RELATIVELY method		
		Positioning by DRAG		
		Positioning by BRANCH command		
		Orienting the pipes		
		Orienting the COMPONENT		
		Connecting the elements		
		Connecting the BRANCH		
		Connecting the COMPONETS		
		Utilities		
		Using DATA CONSISTANCY		
		Using CLASHES command		
		Using Aid CE ARROW option		
		Use of PIPE ISOMETRIC		
		Use of SYSTEM ISOMETRIC		
		Use of SHOW PIPE SYSEMS		
		Use of CHECK BRANCH DETAILS		
		Setting the geometry		
		Using DEFAULT SPEC		
		Using CHOOSE options		
10	Session 10	Exercises included for practice	Practicals	2.0 Hrs
		Draft manager		
		Understanding draft hierarchy		
		Using CREATE VIEW command		
		Using MODIFY VIEW command		
		Using ALIGN VIEW command		
		Using ROTATE VIEW command		
		Using LIMIT DEFINE command		
		Using USER DEFINE command		
		Using PRE DEFINE command		
		Using CREATE DIMENSION		
		Using DIMENSION DEFINITION command		

11	Session 11	Using DIMENSION POINTS command Using CREATE GAPS command Using DIMENSION REATTACH command Using DIMENSION BLANKING command Using PROJECTION TEST command Using GENERAL LABEL command Using AUTO TAG command Defining TEXT CONTENTS Defining LABEL PLACEMENT Using CREATE LAYER command Defining LAYER DEFINITION Defining LAYER VISIBLITY Defining LOCAL RULES Defining HATCH RULES Defining GRAPHIC UPDATE Using GET WORK command Converting to DXF /DGN Configurable DXF/DGN Creating /modifying SECTION Defining EQUIPMENT CENTER LINE Defining PIPE END LABEL Creating AUTO DRAWING PRODUCTION Creating STEEL WORK DETAILING Creating LOAD TEXT Creating DRAWING PRIMITIVES Creating LOCAL SYMBOLS Creating 2D CONSTRUCT Creating SKETCH DRAFTING Creating DYNAMIC PRIMITIVES Creating DYNAMIC TEXT	Theory/Demo	2.0 Hrs
12	Session 12	Exercises included for practice	Practicals	2.0 Hrs
13	Session 13	**Iso-generation** Using BASIC ISOMETRIC option Using ADVANCE ISOMETRIC option Converting to DXF **Spooler** Defining FABRICATION and DESIGN EXPLORER Defining SPOOL DRAWING HIERARCHY Defining WELD Defining SPOOL BREAK Defining SPOOL UPDATE	Theory/Demo	2.0 Hrs
14	Session 14	Exercises included for practice	Practicals	2.0 Hrs
15	Session 15	**Report generation** RUN REPORT Defining NOZZLE SCHEDULE Defining LINE SCHEDULE Defining PIPE MTO Defining TUBE MTO Defining SCTN MTO Creating REPORT Modifying report Deleting the report Creating QUICK REPORT Creating REPORT SUMMARY	Theory/Demo	2.0 Hrs
16	Session 16	Exercises included for practice	Practicals	2.0 Hrs
		General commands **Display** Using VIEW command Using PLOT VIEW command Using DRAW LIST command Using My DATA option Using REFERENCE LIST Using MEMBERS and ADVANCED MEMBERS command Using COMMAND LINE Using PLOT VIEW command		

Essential in PDMS (40 Hours)				
17	Session 17	**Windows** CASCADE window Closing all WINDOW Using TILE HORIZONTALLY Minimizing all windows **Settings** Graphics option NAMING methods Defining UNITS Using CLASHES Defining PROPERTIES Using PICK FILTER Using PICKING CONTROL OPTION Using EXPLORER TOOL Defining TOLERANCE Defining ASL STANDARDS Defining ASL SETTINGS Defining DEFAULT EDGE DRAWING	Theory/Demo	2.0 Hrs
18	Session 18	Exercises included for practice	Practicals	2.0 Hrs
19	Session 19	**Utilities** Defining CLASHES Auto NAMING command Defining WORKING PLANE Defining CONSTRUCTS OPTION User GRID SYSTEM command Creating AID CE ARROW Creating LIST Creating DB LIST Import MACRO command Using PIPE SPLITTING option Defining MASS PROPERTIES Defining REFERENCE DATA **PROJECT REVIEW**	Theory/Demo	2.0 Hrs
20	Session 20	Exercises included for practice	Practicals	2.0 Hrs
