Essential in AutoCAD (40 Hours)

S.No	Session	Topics	Type	Duration (min)
1	Session 1	**Fundamentals of engineering drawing** Introduction to drawing & drafting Types of drawing in engineering drawing Steps to prepare technical drawings Understanding Projections & Quadrants Introduction to AutoCAD: GUI Tool Set File Management Navigation: Zoom, Pan Understanding Coordinate System	Theory / Demo	120
2	Session 2	**Basic Drawing Technics** **Standards**: Units, Limits **Drafting settings:** Snap, Grid, Polar tracking, Dynamic input **Basic Drawing tools**: Line, Circle Arc, Ellipse, Donut, Polygon, Rectangle, Point **Basic Editing tools**: Object Selection Technics, Erase, Undo, Redo, Explode	Theory / Demo	120
3	Session 3	Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Practice	120
4	Session 4	**Basic Modify Technics** Move, Copy, Rotate, Offset, Mirror, Array, Scale, Stretch, Trim, Extend, Break, Join, Fillet, Chamfer.	Theory / Demo	120
5	Session 5	Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Practice	120
6	Session 6	**Setting Properties** **Object Properties:** Lineweight, Linetype, Color, Match Properties **Leader**: Introduction, Leader, Q Leader, MLeader, Leader Style Manager **Lettering:** Guidelines, Text, MText, Text style, Lineweight & Style, Table, Table style, DIM reassociate, DIM jogline & Update	Theory / Demo	120
7	Session 7	Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Practice	120
8	Session 8	**Dimensions** Dimension Terms & Notations, Rule & Technics, Dimstyle Manager **Dimension Creation & Editing Technics:** Linear, Aligned, Radial, Angular, Ordinate, Arc length, Baseline dimension & Continuous dimension, Tolerance, Quick measure	Theory / Demo	120
9	Session 9	Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Practice	120
10	Session 10	Multiline, Polyline, Spline, Construction Line, Ray, Wipeout Multiline style,MLine edit, Polyline edit, Spline edit, Grip editing, Array edit, Change space, Reverse, Copy nested, Delete duplicated object, Draw order, Text to front	Theory / Demo	120
11	Session 11	Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Practice	120
12	Session 12	**Hatch Techniques** **Introduction:** Hatch, patterns & material **Hatch:** Hatch & Gradient, Options, Hatch edit, Island, Boundary & Fill **Layers & Layer Management** Layer creation & management, Layer state	Theory / Demo	120
13	Session 13	Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Practice	120

Essential in AutoCAD (40 Hours)				
14	Session 14	**Views in AutoCAD** Isometric view & Orthographic view, Sectional view & Detail view, Preparing drawings in Isometric view Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Theory / Demo Practice	120
15	Session 15	**Blocks in AutoCAD** **Blocks:** Creating a block, Base specification, Converting block into drawing file, Editing a block, Insert using block palette, Divide, Design centre, Tool palette, Count	Theory / Demo	120
16	Session 16	Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Practice	120
17	Session 17	**Object Linking & Embedding** **Introduction**: Embed object & Link object **Attributes:** Creating, Editing and Managing Attributes **Insert Object**: Inserting object, Updating the linked objects, Adjusting the proportion of the inserted object, Creating hyperlinks **Cut, Copy & Paste**: Copy to clipboard & its settings; Pasting settings, Cut base	Theory / Demo	120
18	Session 18	Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Practice	120
19	Session 19	**Layout, Plot & Publish** **Introduction to plotting:** Layout, PSpace, MSpace, Page setup, Adjusting scale of drawings, Plot & Publish	Theory / Demo	120
20	Session 20	Practice examples demonstrated by the instructor during the theory section. Hands-on exercise from your reference guide as guided by the instructor Workbook exercise to the practiced, instructor will guide you on the exercise number to be practiced by the day	Practice	120
