Essential in 5D BIM (40 Hours)

S.No	Session	Topics Covered	Type	Duration (hrs)
1	Session 1	Introduction to Navisworks About Autodesk Navisworks Manage Work With Files User interface Files and File types File Formats	Theory/Practical	2 Hrs
2	Session 2	Excercise Inclucded for practice	Practical	2 Hrs
3	Session 3	Append Files Merge Files Refreshing Flies Save files Delete Files Options Editor	Theory/Practical	2 Hrs
4	Session 4	Excercise Inclucded for practice	Practical	2 Hrs
5	Session 5	Selection tree 3D sectioning Viewpoints Select Object Hide Object Object Attributes Create and use set of Objects Find Item	Theory/Practical	2 Hrs
6	Session 6	Excercise Inclucded for practice	Practical	2 Hrs
7	Session 7	Comments, Redlines and tags Manipulate Object Attributes Transform Objects Measure tools Application Profiler Grids and Levels Links Object Properties Quick Properties	Theory/Practical	2 Hrs
8	Session 8	Excercise Inclucded for practice	Practical	2 Hrs
9	Session 9	Over View of Clash Detection Clash detective Window Working With Clash tests Use Clash Tests Set Clash Rules Select Object for Clashing View Clash results Produce clash Report	Theory/Practical	2 Hrs
10	Session 10	Excercise Inclucded for practice	Practical	2 Hrs
11	Session 11	Timeliner Timeliner Window Tasks tab Data Source Tab Configure tab Simulate tab Timeliner Costs	Theory/Practical	2 Hrs
12	Session 12	Excercise Inclucded for practice	Practical	2 Hrs
13	Session 13	About Quantification Takeoff Methods Supporting File types Quantification Tool Quantification Workbook Catalogs Resources Perform Model Takeoff	Theory/Practical	2 Hrs
14	Session 14	Excercise Inclucded for practice	Practical	2 Hrs
15	Session 15	Perform Virtual Take off Perform 2D takeoff Manage Takeoff Data Update and Analyze data	Theory/Demo	2 Hrs

Essential in 5D BIM (40 Hours)				
		Export Takeoff Data		
16	Session 16	Excercise Inclucded for practice	Practical	2 Hrs
17	Session 17	Animator Animator Tree view Animator Toolbar Animator Timeliner View Work with Animation Scenes Work with Animation Sets Work with Camera Use Animator for Soft Clashing Work With Scripts Work with Actions Work with Events	Theory/Practical	2 Hrs
18	Session 18	Excercise Inclucded for practice	Practical	2 Hrs
19	Session 19	Autodesk Rendering Overview Adding Materials to a Model Creating and Editing Materials Material Mapping Lighting Sun and Sky Lights Exposure Control Ground Planes Photorealistic Rendering	Theory/Practical	2 Hrs
20	Session 20	Excercise Inclucded for practice	Practical	2 Hrs
