Essential in Revit Architecture (40 Hours)

S.No	Session	Topics Covered	Type	Duration (hrs)
1	Session 1	**Introduction:** About BIM, Introduction to Autodesk Revit Architecture **Revit File Types:** Understanding Project, Project Templates, Families **GUI:** Exploring Recent Files, Understanding Primary User Interfaces, Exploring Application Menu, Quick Access Toolbar, Title Bar, Info Center, Ribbon, Project Browser, Viewing Control, Status Bar, Context Menu and Drawing Menu **Building Elements:** Defining Building elements, Building Element Types **Starting a New Project:** Starting a project using Template, Using No Template and Saving Project Files.	Theory/Demo	2.0 Hrs
2	Session 2	Excercise included for practice	Practical	2.0 Hrs
3	Session 3	**Drawing Aids:** Alignment Lines, Snaps and Project Units **Levels:** Adding Levels, Modifying Levels, Creating Level Head, Constrain Levels **Grids:** Adding Grids, Editing Grid Bubbles **Walls:** Creating and Modifying Walls, Create New Wall type, Location Line, Wall joins, Add Partition Wall	Theory/Demo	2.0 Hrs
4	Session 4	Excercise included for practice	Practical	2.0 Hrs
5	Session 5	**Walls:** Wall layer wrapping, Understanding Stacked Wall, Creating Stacked Wall, Guidelines for Creating Stacked Walls, Vertically compound Wall, Wall shapes and Openings, Wall sweeps and Reveals **Construction Modeling Tools:** Understanding Parts, Divide Parts, Dividing Parts by Sketching, Dividing Parts by Reference, Understanding Assemblies, Creating Assemblies, Creating Assembly View and Sheets, Placing an assembly on Sheet	Theory/Demo	2.0 Hrs
6	Session 6	Excercise included for practice	Practical	2.0 Hrs
7	Session 7	**Modify Tools:** Move by Dragging, Moving End Joined Element, Moves with Nearby Elements, Restriction to Move with Nearby Elements, Creating copies using Copy tool, Create Similar, Rotate, Mirror Array: Linear Array, Radial Array **Scale:** Resize the elements using scale tool, scaling numerically, resizing elements with shape handles, resizing using formulas **Split Element:** Split with gap, Joining walls that are split with a gap between them, unjoining walls created using split with gap **Trim:** trim or extend to corner, trim or extend single element, trim or extend multiple elements Align, Offset, Pin, Unpin Elements **Doors & Windows:** Adding doors and windows, Moving Doors and windows to a different wall & Tape Measure too **Keyboard Shortcuts:** Adding Keyboard Shortcuts, removing shortcuts, import keyboard shortcuts, export keyboard shortcuts.	Theory/Demo	2.0 Hrs
8	Session 8	Excercise included for practice	Practical	2.0 Hrs
9	Session 9	**Floor:** Adding Floor, Creating Sloped Floor using Slope Arrow, Creating Sloped Floor using Parallel Sketch Lines, Floor Slab Edge **Ceiling:** Create Ceiling, creating ceiling using automatic ceiling tool **Components:** Placing Components, Working with Modern Medium Library	Theory/Demo	2.0 Hrs
10	Session 10	Excercise included for practice	Practical	2.0 Hrs
11	Session 11	**Roof:** Adding Roof by Footprint, Adding Roof by Extrusion, Adding Sloped Glazing **Modifying Roof:** Change the Overhang, Align Rood Ridges, **Shape editing for Roofs and Floors:** Using Sub Element Tool, Using Add point tool, using Split Line Tool, Using Pick Support Tool, Using Curved Edge Condition Too Roof Soffit, Roof Fascia & Roof Gutter **Openings:** Opening on face and Vertical Opening, Wall opening, Shaft opening and Dormer Opening	Theory/Demo	2.0 Hrs

Essential in Revit Architecture (40 Hours)				
12	Session 12	Excercise included for practice	Practical	2.0 Hrs
13	Session 13	**Dimensions:** Understanding the Types of Dimensions in Revit Architecture, Temporary Dimensions, Permanent Dimensions, Modifying Dimensions **Constraints:** Applying Constraints with Dimension, Equality Constraint and Anchoring Dimensions **Managing View:** Plan views, View range, Plan region, Elevation View, Section, 3D Views, Cropping View, Visibility or Graphics, View Templates, Visual Styles and Filter Graphic Display Options	Theory/Demo	2.0 Hrs
14	Session 14	Excercise included for practice	Practical	2.0 Hrs
15	Session 15	**Curtain Wall:** Understanding the Curtain Wall, Creating Curtain Walls, **Adding Curtain Grids:** Curtain Grid snapping, Excluding grid from curtain panels **Mullions:** Mullion Profiles, Controlling Mullion Join, Corner Mullions, Quad Corner Mullion, Trapezoid Corner Mullion, Adding Curtain Door to Panel **Embedded Walls:** Embedding wall into Another Wall **Stair:** Creating Stair by component, Creating stair by sketching, Creation of Stair using Stair Calculator, Modify stair railings Customizing stair documentation **Ramp & Railings:** Add railings by sketching, Modify railing, Modifying continuous rail	Theory/Demo	2.0 Hrs
16	Session 16	Excercise included for practice	Practical	2.0 Hrs
17	Session 17	**Text:** Adding text notes, Modify text notes, Model text and editing model text **Tag:** Tag tools, Applying tag by category, Tag all not tagged, Material Tag and modifying tags **Keynote:** Types of Keynote, Placing Keynotes, Keynoting Settings, Custom Keynotes and Adding Tag and Keynote in 3D view **Callout Views:** Types of Callouts **Detailing:** creating detail views, Creating drafting views, Importing views from CAD program, Reusing drafting view, Inserting detail components, Repeating detail	Theory/Demo	2.0 Hrs
18	Session 18	Excercise included for practice	Practical	2.0 Hrs
19	Session 19	**Schedules:** Creating Schedules/quantities, specifying Schedule properties, Custom parameters, Modify schedules, Material take off schedules, Annotation schedules or note blocks, Creating annotation schedule, Reusing schedule views **Rooms:** Creating rooms, Room boundaries, Room volume, Situations that can effect Room volume computations, Room tag, Schedule Keys **Area:** Area schemes, Area types, Area plans, Area tags **Color Scheme:** creating color scheme, applying color scheme, color fill legend, Understanding Legends	Theory/Demo	2.0 Hrs
20	Session 20	Excercise included for practice	Practical	2.0 Hrs
