Essential in Revit MEP - 40 Hours

S.No	Session	Topics	Type	Duration (Hours)
1	Session 1	**AN INTRODUCTION TO REVIT MEP** Introduction to Revit MEP Design **Graphical User Interface:** Ribbon Tabs Contextual tabs Family Editor tabs Customizing ribbon Quick access toolbar Options Bar Properties Palette Project Browser View Control Bar Status Bar Info center **User Interface Control** Menu and Settings Keyboard Shortcuts Graphics Context Menu **Monitoring Elements within Shared Models** Copy/Monitor Copy Elements from a Linked Model Monitor Elements in a Linked Model Copy/Monitor Workflow for Linked Models Reviewing Warnings for Monitored Elements Actions for Coordination Review Stopping Element Monitoring Link CAD Files	Theory/Demo	2.0Hrs
2	Session 2	Exercises included for Practice	Practicals	2.0Hrs
3	Session 3	**WORKSHARING** **Collaboration** Central files Create a New work set Create a new Local file Synchronizing a Local file with Central file **Work sharing** Working with Linked Revit file Placing Link Revit file Using Shared Coordinates Managing Revit Links Controlling Visibility of Revit Links	Theory/Demo	2.0Hrs
4	Session 4	Exercises included for Practice	Practicals	2.0Hrs
5	Session 5	**HVAC COOLING AND HEATING LOAD ANALYSIS-I** **Space Modeling:** Placing Spaces Space Property Schedule Modify Space Properties Zones **Performing Heating and Cooling Load Analysis Supply Airflow schedule:** Load Analysis, Heating and Cooling loads report	Theory/Demo	2.0Hrs
6	Session 6	Exercises included for Practice	Practicals	2.0Hrs

Essential in Revit MEP - 40 Hours				
7	Session 7	**HVAC COOLING AND HEATING LOAD ANALYSIS-II** Logical systems Mechanical settings System Browser **Setting Up Air Systems:** Parameters **Mechanical System & Duct Work:** Air distribution components **Mechanical Equipment Components:** Air Conditioning/Handling Units VAV Boxes **Duct Work:** Create New duct Types Flex Duct Automatic Duct routing Manual Duct routing	Theory/Demo	2.0Hrs
		Mechanical Piping System: Parameters Creating Pipe systems Creating Pipe Types Selecting Fitting for Pipe Types Mechanical pipe settings **Pipe Routing Options:** Automatic & Manual Pipe Routing **Pipe Fittings:** Using Pipe Fitting controls & Placing Fittings System Filters	Theory/Demo	2.0Hrs
8	**Session 8**	**Exercises included for Practice**	**Practicals**	**2.0Hrs**
9	Session 9	**FAMILY CREATION** Reference Planes and Lines Constraints and Dimensions **Parameters:** Types of parameters Instance Parameters Parameter Discipline Type, Grouping **3 kind of Family:** System Families Loadable Families In-Place Families Family Editor Tools Type Catalog Family	Theory/Demo	2.0Hrs
10	**Session 10**	**Exercises included for Practice**	**Practicals**	**2.0Hrs**
11	Session 11	**Solid Modeling:** Extrusions Blends Revolves Sweeps Swept Blends Join geometry Voids Visibility control **Equipment connectors:** Pipe connectors Electrical connectors Duct connectors	Theory/Demo	2.0Hrs
12	**Session 12**	**Exercises included for Practice**	**Practicals**	**2.0Hrs**

Essential in Revit MEP - 40 Hours				
13	Session 13	**EFFICIENT LIGHTING DESIGN** Spaces and Lighting Reflected Ceiling plan Lighting Analysis Light Fixtures Ceiling changes Overhead fixtures Wall – mounted lights Switches **Power and Communications:** Modeling Methods for Power and Systems Devices Using Annotation Symbols Using Face–Hosted Families Avoiding Interference of Symbols Creating Circuits **Placing Devices and Equipment Connections:** Disconnect Switches Distribution Equipment and Transformers Switchboards Panels	Theory/Demo	2.0Hrs
14	**Session 14**	**Exercises included for Practice**	**Practicals**	**2.0Hrs**
15	Session 15	**Creating Power Distribution Systems:** Modeling Conduit and Cable Tray Defining Electrical Settings Placing Conduit in a Model Placing Cable Tray in a Model **Circuiting and Panels** Establishing Electrical Settings Wiring Settings Voltage Definitions Distribution Systems Load Calculations **Creating Circuits and Wiring for Devices and Fixtures:** Editing Wiring Editing Circuits Drawing Wires Manually Controlling Wire Display **Managing Circuits and Panels** Circuit Properties Wire Properties Panel Properties	Theory/Demo	2.0Hrs
16	**Session 16**	**Exercises included for Practice**	**Practicals**	**2.0Hrs**
17	Session 17	**PLUMBING** Working with Plumbing Fixtures Sloping Pipe Annotating Invert Elevation and Slope Using Fittings Using Pipe Fitting Controls	Theory/Demo	2.0Hrs
18	**Session 18**	**Exercises included for Practice**	**Practicals**	**2.0Hrs**
19	Session 19	**DRAFTING AND DETAIL TOOLS** Line Styles Regions Detail Components CAD Details Drafting Views Detail Library Detail Views **Sheets:** Creating a Title block Using Existing CAD Graphics Sheets in a Project File Placing Views on Sheets Viewports Properties Annotations Schedules Sheet Revisions Printing Sheets Export	Theory/Demo	2.0Hrs
20	**Session 20**	**Exercises included for Practice**	**Practicals**	**2.0Hrs**
