Essential in V-Ray (40 Hours)

S.No	Session	Topics Covered	Type	Duration (hrs)
1	Session 1	**Introduction** Introduction to V-Ray Highlights of V-Ray Understanding the Graphical user Interface Understanding the Vray Frame Buffer V-Ray rendering engines Understanding the Rendering Understanding production rendering and Real-Time Rendering mode. Render Ready	Theory/Demo	2.0 Hrs
2	Session 2	Practice 01: Create a render ready scene	Practical	2.0 Hrs
3	Session 3	**V-Ray Image Sampling** Concept of image Sampling Understanding the antialiasing quality and shading quality Controlling the quality of Interior and Exterior renderings using Render Settings.	Theory/Demo	2.0 Hrs
4	Session 4	Practice 02: Create and save a preset.	Practical	2.0 Hrs
5	Session 5	**V-Ray Lights** Introduction to Lighting concept Understanding the Vray Area lights and its various types Exploring options for interior renderings Vray Lights and 3ds Max Lights Understanding the Vray Ambient Lights Vray Dome Light and its various settings Creation of Vray IES Light and its various settings Understanding the Sun and Sky Light and its various settings for exterior renderings Creating and editing parameters of natural light objects- Sun and sky light	Theory/Demo	2.0 Hrs
6	Session 6	Practice 03: Create and add mesh light to an interior scene	Practical	2.0 Hrs
7	Session 7	**GI for Exterior and Interior Scenes** Introduction to GI Concept Understanding the various rendering engines for primary and secondary engines Understanding the GI settings for Exterior Scenes using various rendering engines Understanding the GI settings for Interior scenes using various rendering engines	Theory/Demo	2.0 Hrs
8	Session 8	Practice 04: Create render settings for interior and exterior scenes.	Practical	2.0 Hrs
9	Session 9	**GI for Exterior and Interior Scenes** Understanding the GI for Quick Animation renderings and its various options Concept of Caustics effects Understanding the Settings and options in Lights Render setup for Caustics effect Creation of caustics effects	Theory/Demo	2.0 Hrs
10	Session 10	Practice 05: Create caustics effects.	Practical	2.0 Hrs
11	Session 11	**V-Ray Physical Camera** Introduction to Camera Understanding the various settings and options in Vray Physical Camera Controlling Exposure using Camera settings Understanding the Depth of Field effect and settings Creation of Depth of Field Effect Understanding the Motion Blur effect Creation of Motion Blur using Vray Physical Camera.	Theory/Demo	2.0 Hrs
12	Session 12	Practice 06: Create and set a scene for render.	Practical	2.0 Hrs
13	Session 13	**V-Ray Materials** Introduction to Vray Materials Creation of Vray Materials Understanding the Diffuse and Roughness parameters in Vray Materials Understanding the Reflection property of a material and its various settings Creation of reflective materials	Theory/Demo	2.0 Hrs
14	Session 14	Practice 07: Create and add materials to an interior scene	Practical	2.0 Hrs
15	Session 15	**V-Ray Materials** Understanding the refraction property of a material Creation of refractive materials and various its various settings Understanding the Translucent Property Creating tanslucent materials using its various options Understanding the Bump and normal mapping Creation of Textured Metals Brushed Metals using Maps.	Theory/Demo	2.0 Hrs

Essential in V-Ray (40 Hours)				
16	Session 16	Practice 08: Create and add materials to a scene	Practical	2.0 Hrs
17	Session 17	**V-Ray Aerial Perspective** Introduction to Vray Aerial perspective Understanding the various options available in Vray Aerial Perspective Mode Creating the Aerial Perspective View Understanding the Vray Environment Fog Effect and its various settings Creation of Vray Environment Fog Perspective effect	Theory/Demo	2.0 Hrs
18	Session 18	Practice 09:Add environment effects to an exterior scene.	Practical	2.0 Hrs
19	Session 19	**V-Ray Displacement MOD** Introduction to Displacement Mod and its various types Understanding Vray Proxy Creation of Vray Proxy Concept of Vray Instancer Creation of Vray Instancer Understanding the Vray Fur concept and its various options Creation of Vray Fur.	Theory/Demo	2.0 Hrs
20	Session 20	Practice 10: Create an environmental scene using proxy and scatter.	Practical	2.0 Hrs
