Essential in Vray SketchUp (40 Hours)

S.No	Session	Topics Covered	Type	Duration (hrs)
1	Session 1	**Introduction** Introduction to V-Ray Highlights of V-Ray Understanding the concept of rendering Types of rendering Understanding Ray traced rendering **V-Ray rendering engines** Understanding production rendering and Real-Time Rendering mode. **V-Ray Image Sampling** Concept of image Sampling Understanding the render setting for interior and exterior renders. **Components of Render Scene** Introduction to components of rendering scene Elements of Render-ready models	Theory/Demo	2 Hrs
2	Session 2	Practice 01: Create a render ready scene	Practical	2 Hrs
3	Session 3	**Starting V-Ray** Understanding the GUI V-Ray Toolbar V-Ray Asset Editor V-Ray frame Buffer V-Ray Color Picker V-Ray Menu V-Ray Utilities **V-Ray Render Settings** Render preset in V-Ray V-Ray Vision	Theory/Demo	2 Hrs
4	Session 4	Practice 02: Create and save a custom render preset	Practical	2 Hrs
5	Session 5	**Render-Ready** Elements of Render-ready models V-Ray Proxy Chaos Cosmos Usage Parameters Lights, HDRIs, Materials	Theory/Demo	2 Hrs
6	Session 6	Practice 03: Create a proxy for a vegetation component.	Practical	2 Hrs
7	Session 7	**V-Ray Lights** Introduction to Lighting concept Understanding various types of lighting- interior and exterior Natural and Artificial lights Creating and editing parameters of natural light objects- Sun and sky light	Theory/Demo	2 Hrs
8	Session 8	Practice 04: Create an evening sunset sky with V-Ray Sun- Exterior render.	Practical	2 Hrs
9	Session 9	**V-Ray Lights** Creating and editing parameters of artificial light objects- Rectangle light, sphere light. Creating and editing parameters of artificial light objects- Mesh light	Theory/Demo	2 Hrs
10	Session 10	Practice 05: Create and add mesh light to an interior scene	Practical	2 Hrs
11	Session 11	**V-Ray Lights** Creating and editing parameters of artificial light objects- Dome light Creating and editing parameters of artificial light objects- Spot light, Omni light Creating and editing parameters of artificial light objects- IES light V-Ray Light Gen	Theory/Demo	2 Hrs
12	Session 12	Practice 06: Create and add IES light to an interior scene	Practical	2 Hrs
13	Session 13	**V-Ray Materials and Textures** Introduction to V-Ray materials Preset Library Asset Editor Options Attribute	Theory/Demo	2 Hrs
14	Session 14	Practice 07: Add materials to an interior scene	Practical	2 Hrs
15	Session 15	**V-Ray Materials and Textures** Creating materials Material Parameters Diffuse, Reflection, Refraction, Coat, Opacity, Bump, binding.	Theory/Demo	2 Hrs

Essential in Vray SketchUp (40 Hours)				
16	Session 16	Practice 08: Create and add materials to an interior scene	Practical	2 Hrs
17	Session 17	**V-Ray Geometry** **Virtual Geometry** Infinite Plane Clipper Proxy Mesh Fur Displacement Scatter Decal	Theory/Demo	2 Hrs
18	Session 18	Practice 09: Add fur to a furniture component in the interior scene	Practical	2 Hrs
19	Session 19	**V-Ray Camera** Camera parameters Camera types Depth of Field Effects Bokeh **V-Ray Render Elements** Object ID Render ID Light Denoiser **Final Render** Components of a final render	Theory/Demo	2 Hrs
20	Session 20	Practice 10: Produce a final render for both interior and exterior scenes.	Practical	2 Hrs
