Curriculum For OpenRoad Software - 40 Hours

CADD CENTRE

Sl.No	Session	Session	Type	Duration (min)
1	Session 1	**Overview:** 1) Introduction to OpenRoad 2) Features of OpenRoad 3) Application of OpenRoad 4) Advantages of OpenRoad 5) Basic Concept **GUI:** 1) Understanding Welcome Screen 2) Understanding Menu bar 3) Understanding Ribbon bar 4) Understanding Prompt bar 5)Understanding about the View Window 6) Understanding the Status bar	Theory / Demo	120
2	Session 2	Practice : 1 GUI, Toolbars, Start a new Project	Practicals	120
3	Session 3	**Setting a Project** 1) Creating a new Workspace 2) Creating a new Worksets **Starting a Project** 1) Introducing Geometry 2) Attaching Files 3) Element Selection Method 4) Viewing Properties of an Element 5) Creating a open Profile	Theory / Demo	120
4	Session 4	Practice : 2 Creating a New Project	Practicals	120
5	Session 5	**Alignment** **Types of Alignment** **1) Horizontal Alignment** a) What is Horizontal Alignment ? b) What are the Application of horizontal Alignment? c) Attaching the required file d) Creating a horizontal alignment by using lines and curves e) Creating Compex Element f) Taking Horizontal Report	Theory / Demo	120
6	Session 6	Practice : 3 Horizontal Alignment	Practicals	120
7	session 7	**1) Vertical Alignment** a) What is Vertical Alignment? b) What are the Application of vertical Alignment? c) Adding a station d)Open Profile e) Creating a Vertical Alignment by using lines and curves f) Creating Complex Element	Theory / Demo	120
8	Session 8	Practice : 4 Vertical Alignment	Practicals	120
9	Session 9	**Beyond Centreline** a) Change Feature Definition b) Offsets and Tapers - Methods c)Pavement Design d) Shoulder Design e) Sidewalk Design	Theory / Demo	120
10	Session 10	Practice : 5 Design Pavement, Shoulder, Sidewalk	Practicals	120
11	Session 11	**Toolbox** **1) Modify :** a) Modify element, Break Element, Trim b) Fillets, Chambers, Delete elements **2) Measure :** a) Measure Angle, Measure Radius, Measure Distance b) Measure Length, Measure Area, Measure Volume **3) Manipulate :** a) Move, Copy, Rotate, Mirror b) Scale, Move Parallel, Array, Stretch	Theory / Demo	120
12	Session 12	Practice : 6 Modify, Measure, Manipulate	Practicals	120
		Corridor Modeling a) What is Corridor?		

Curriculum For OpenRoad Software - 40 Hours				
13	Session 13	b) Application of Corridor c) Create a new corridor d) Create a new template e) Create a new template drop f) Transitions g) Create a 3D view, Take Reports	Theory / Demo	120
14	Session 14	Practice : 7 Corridor Modelling	Practicals	120
15	Session 15	**Superelevation** a) What is Superelevation? b) Create a superelevation c) Calculate Superelevation d) Open superelevation View e) Take Report for Superelevation f) Componenets Quantities	Theory / Demo	120
16	Session 16	Practice : 8 Superelevation Design	Practicals	120
17	Session 17	**Earthwork Design** a) What is Earthwork Design? b) Application of Earthwork Design c) Cross Section View d) Volume Cut Fill e) Civil Analysis Tool f) Create a 3D view, Report creation	Theory / Demo	120
18	Session 18	Practrice : 9 Create a Earthwork Design	Practicals	120
19	Session 19	**Named Boundries** a) Create cross section Named Boundries b) Create Sheet View c) Create Corridor Object d) Creating Text e) Creating Annotations	Theory / Demo	120
20	Session 20	Practice : 10 Creating Views	Practicals	120
